Duftstoffverbot In Krankenhausern der Region Västra Götaland Schweden

(leider nur in Schwedisch und kurz in Englisch)

All 17 hospitals in the Swedish region Västra Götaland near Gothenburg are scentfree from the 10th of September 2008.

The politicians in the region's health committee have decided that all 45.000 employees in the hospital and health departments are to follow the same scentfree and smokefree rules. That includes primary care and dentists too. It is supposedly the first time in the world that such a big collective effort has been made for a scentfree health environment. Official press release from the 10th of September 2008.

Doft- och rökfritt i sjukvården.

Anmerkung Scherrmann:

Hoffen wir, dass viele Regionen dieser Welt beginnen, wahrzunehmen, wie gesundheitsschädlich Duftstoffe sein koennen und dass sie wie in Schweden im Distrikt Götaland aus dem Wissen Konsequenzen ziehen.
